

**Proposal for Task Force Consideration
at the ISSC 2017 Biennial Meeting**

- a. Growing Area
- b. Harvesting/Handling/Distribution
- c. Administrative

Submitter	Executive Board																														
Affiliation	Interstate Shellfish Sanitation Conference (ISSC)																														
Address Line 1	209 Dawson Road																														
Address Line 2	Suite 1																														
City, State, Zip	Columbia, SC 29223-1740																														
Phone	803-788-7559																														
Fax	803-788-7576																														
Email	issc@issc.org																														
Proposal Subject	Direct Plating Method for trh																														
Specific NSSP Guide Reference	Section IV. Guidance Documents Chapter II. Growing Areas .11 Approved NSSP Laboratory Tests																														
Text of Proposal/ Requested Action	<p>This method was developed by Jessica Jones (FDA Gulf Coast Seafood Laboratory) and is being submitted by the ISSC Executive Board. The Executive Board granted interim approval to this method on March 13, 2015. The Executive Board is submitting this proposal to comply with Article V. Section 1. of the ISSC Constitution, Bylaws, and Procedures.</p> <p>Submitted by method developer Jessica Jones (FDA Gulf Coast Seafood Laboratory)</p> <p>5. Approved Methods for Vibrio Enumeration</p> <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th style="width: 15%;"></th> <th style="width: 45%;">Vibrio Indicator Type:</th> <th style="width: 20%;">Application: PHP Sample Type: Shucked</th> <th style="width: 20%;">Applicatio Reopenin</th> </tr> </thead> <tbody> <tr> <td>EIA¹</td> <td><i>Vibrio vulnificus (V.v.)</i></td> <td style="text-align: center;">X</td> <td></td> </tr> <tr> <td>MPN²</td> <td><i>Vibrio vulnificus (V.v.)</i></td> <td style="text-align: center;">X</td> <td></td> </tr> <tr> <td>SYBR Green 1 QPCR-MPN⁵</td> <td><i>Vibrio vulnificus (V.v.)</i></td> <td style="text-align: center;">X</td> <td></td> </tr> <tr> <td>MPN³</td> <td><i>Vibrio parahaemolyticus (V.p.)</i></td> <td style="text-align: center;">X</td> <td></td> </tr> <tr> <td>PCR⁴</td> <td><i>Vibrio parahaemolyticus (V.p.)</i></td> <td style="text-align: center;">X</td> <td></td> </tr> <tr> <td>Direct Plating⁶</td> <td>trh+ <i>Vibrio parahaemolyticus (V.p.)</i></td> <td style="text-align: center;">X</td> <td style="text-align: center;">X</td> </tr> </tbody> </table> <p>Footnotes:</p> <p>¹ EIA procedure of Tamplin, et al, as described in Chapter 9 of the FDA Bacteriological Analytical Manual, 7th Edition, 1992.</p> <p>² MPN method in Chapter 9 of the FDA Bacteriological Analytical Manual, 7th Edition, May 2004 revision, followed by confirmation using biochemical analyses or by the DNA -alkaline phosphatase labeled gene probe (vvhA).</p> <p>³ MPN format with confirmation by biochemical analysis, gene probe methodology as listed in Chapter 9 of the FDA Bacteriological Analytical Manual, 7th Edition, May 2004 revision, or a method that a State can demonstrate is equivalent.</p> <p>⁴ PCR methods as they are listed in Chapter 9 of the FDA Bacteriological Analytical Manual, 7th Edition, May 2004 revision, or a method that a State</p>				Vibrio Indicator Type:	Application: PHP Sample Type: Shucked	Applicatio Reopenin	EIA ¹	<i>Vibrio vulnificus (V.v.)</i>	X		MPN ²	<i>Vibrio vulnificus (V.v.)</i>	X		SYBR Green 1 QPCR-MPN ⁵	<i>Vibrio vulnificus (V.v.)</i>	X		MPN ³	<i>Vibrio parahaemolyticus (V.p.)</i>	X		PCR ⁴	<i>Vibrio parahaemolyticus (V.p.)</i>	X		Direct Plating⁶	trh+ <i>Vibrio parahaemolyticus (V.p.)</i>	X	X

	<p>can demonstrate is equivalent. ⁵<i>Vibrio vulnificus</i>, ISSC Summary of Actions 2009. Proposal 09-113, Page 123. ⁶Direct plating method for <i>trh</i> as described in Nordstrom et al., 2006.</p>
Public Health Significance	<p>Scientific evidence suggests that the presence of the <i>trh</i> gene in <i>V. parahaemolyticus</i> (<i>V.p.</i>) is correlated with higher virulence. Additionally, at the 2013 conference, proposal 13-202 was adopted which requires testing for the presence of <i>trh</i> prior to reopening of growing areas closed as a result of <i>V.p.</i> illnesses [Chapter II @.01.F(5)]. Currently, there are no NSSP approved methods for enumeration of <i>trh</i>. This method is a needed option for testing following <i>V.p.</i> illness closures.</p>
Cost Information	<p>This method costs ~\$5 per test for laboratory consumables, supplies, and reagents. Most equipment needed for testing is standard microbiology equipment, but purchase of a specialized water bath or environmental chamber may be necessary at a cost of ~\$3,000-\$5,000. Additional costs for a laboratory would vary based on their operational overhead and labor.</p>
Action by 2015 Laboratory Methods Review Committee	<p>Recommended referral of Proposal 15-112 to an appropriate committee as determined by the Conference Chair to further review the data submitted.</p>
Action by 2015 Task Force I	<p>Recommended adoption of 2015 Laboratory Methods Review Committee recommendation on Proposal 15-112.</p>
Action by 2015 General Assembly	<p>Adopted recommendation of Task Force I on Proposal 15-112</p>
Action by FDA January 11, 2016	<p>Concurred with Conference action on Proposal 15-112.</p>
