Proposal Subject	Delete Performance Based Inspection Program	
Specific NSSP Guide Reference	Section II, Chapter I@.02.G.	
Text of Proposal/ Requested Action	<p>G. Performance Based Inspection Program (PIP).</p> <p>(1) A performance based inspection program may be instituted by the Authority for any dealer who meets the requirements of this section.</p> <p>(2) The minimum frequency of inspection under a PIP shall be no less than one inspection per certification period. The recertification inspection may qualify as the required minimum inspection frequency.</p> <p>(3) To be eligible for a PIP, the dealer shall have demonstrated a history of satisfactory compliance for the previous three year period. The three year demonstration shall include:</p> <p style="margin-left: 20px;">(a) Full compliance with the minimum inspection frequency shown under Section F.;</p> <p style="margin-left: 20px;">(b) Recertification of the dealer by the Authority;</p> <p style="margin-left: 20px;">(c) Verification that no critical deficiencies, no more than one key deficiency and no more than two other deficiencies have occurred in any one inspection;</p> <p style="margin-left: 20px;">(d) Correction of all identified deficiencies in accordance with the compliance schedule approved by the Authority; and</p> <p style="margin-left: 20px;">(e) No repetition of the identified deficiencies.</p>	
Public Health Significance	Performance based inspections are obsolete and inadequate to meet the <i>Vibrio vulnificus</i> and/or <i>Vibrio parahaemolyticus</i> Control Plan requirements of the NSSP-Model Ordinance. Refrigeration equipment, specifically a refrigerated truck or refrigerated truck body which is being used by the certified dealer as the sole source of refrigeration, it's impossible for that equipment to meet the refrigeration requirements under the current NSSP-Model Ordinance.	
Cost Information	None
