<p>Public Health Significance</p>	<p>These criticality code changes are from [C] to [SC/K]. There are currently two instances under .02 A. Safety of Water for Processing and Ice Production, where the Model Ordinance citation is a Critical. This requirement should be a Swing (Critical/Key), because there are instances where the situation would not warrant a Critical, and an immediate corrective action which could even include a recall. FDA and States have been incorrectly marking these to avoid having to take action on product when there is no immediate public health risk.</p>
