Proposal Subject	Clarification of Model Ordinance Effectiveness Review Committee Responsibility
Specific NSSP Guide Reference	ISSC Constitution Bylaws & Procedures Article IV, Executive Board, Officers, Committees
Text of Proposal/ Requested Action	<p>Section 15.</p> <p>The Executive Board Chairperson shall appoint a thirteen (13) member Model Ordinance Effectiveness Review Committee. The Committee will be comprised of a Chairperson with at least one (1) industry member from the East, Gulf, and West coasts; at least one (1) State regulatory person from each of the ISSC regions; and at least one (1) State regulatory person from a non-producing State. The Committee will also include one (1) voting member from NOAA; one (1) voting member from FDA; and one (1) voting member from EPA. The federal entities will appoint these members. This Committee will review the requirements of the NSSP Model Ordinance and identify requirements that are deemed to be ineffective. The Committee will present recommendations in proposal form to the appropriate Task Force for the deletion or modification of ineffective requirements. New requirements will not be reviewed until <u>after the second (2nd) ISSC Biennial Meeting fourth (4th) year</u> following the implementation date. A four (4) year waiting period will provide adequate time to determine effectiveness of new controls.</p> <p><del>NOTE: Initially the Committee will review all of the requirements in the NSSP that have been in existence for four (4) years or more. Following the initial review, the procedure outlined above would be followed by the Committee prior to the proposal submission deadline.</del></p>
Public Health Significance	Requirements become effective when revisions to the NSSP Guide are published not when the requirement is adopted. Due to review processes, the requirements may not be implemented for some time following the ISSC General Assembly meeting at the Biennial Meeting. To ensure that a requirement has the intended 4 year implementation period for efficiency, requirements should not be reviewed until 2 full conference cycles have passed following its initial inception.
