(NOAA)

Charges

Charge 1: Proposal 13-107 Sources of Seed for Aquaculture

- **The committee is charged to develop a proposal(s) to revise the Model Ordinance Aquaculture chapter to reflect current practices and methods.**

Findings/Conclusions: After a presentation by FDA, the Committee finds that there is sufficient information and need to revise the existing guidance documents related to the revised Aquaculture Chapter.

Additionally, the Committee believes that issues related to aquaculture will continue for the foreseeable future and may require the Committee to be made a standing committee.

Recommendations:

- 1) The Committee recommends that Task Force I refer Proposal 13-107 to the appropriate committee as determined by the Conference Chair with further instruction that said committee be convened before the Spring Executive Board meeting for the expressed purpose of developing a guidance document for the revised Aquaculture Chapter.
- 2) The Committee recommends to the Executive Board that the Aquaculture Committee be made a Standing Committee under the ISSC Constitution and By-Laws.
