Charges

Charge 1: Annual Review of Trends in V.p. illness.

Findings/Conclusions:

Discussion by committee on ISSC providing more detail on ability of Conference to identify funding for Charge 1 and 2 under estimating consumption patterns, including collection of data regarding the number of shellfish consumer per serving, through market research, end point consumer data, or other information gathering methods.

FDA is prioritizing annual production reporting in their state evaluations.

Recommendations: No recommendations.

Charge 2: Proposal 13-200 Reducing the Risk of Vibrio Illnesses

Findings/Conclusions:

Discussion by committee on Charge 2a how communication needs to improve between state epidemiologists and state authorities investigating illnesses. Provide more complete information on COVIS forms.

Recommendations:

Motion made by Lori Howell that the conference appoint a committee to work on improvement in the data received regarding the collection of source state information for Vp illness cases. The motion was seconded by Chris Nelson.

After discussion, Lori proposed a friendly amendment, with the second's agreement, that the information available be compiled and reported to the Board at the spring meeting.

Compiled motion:

The conference appoint a committee to work on the improvement in the data received regarding the collection of source state information for Vp illness cases, and the information available be compiled and reported to the Board at the spring meeting.
