DEC TEMPORARILY CLOSES SHELLFISHING AREAS IN THE TOWN OF HUNTINGTON, SUFFOLK COUNTY

Precautionary Closures Follow Reports of Shellfish Related Illnesses

The New York State Department of Environmental Conservation (DEC) today announced that the harvesting of oysters and hard clams from particular areas in the Town of Huntington is temporarily prohibited, effective at sunrise on Friday, September 5. The closures are due to reports of foodborne illnesses associated with consumption of shellfish from harvest area NS-3. DEC is taking precautionary measures necessary to protect public health until a determination is made that shellfish do not pose a threat to shellfish consumers.

The ban on the harvest of oysters affects approximately 4400 acres. It includes all of Centerport Harbor, Duck Island Harbor, Northport Bay, Lloyd Harbor and that portion of Huntington Bay lying south of a line extending easterly from Target Rock, near Lloyd Neck, to the north side of the beach pavilion at the Town of Huntington's Hobart Beach, on Eatons Neck.

The ban on the harvest of hard clams affects approximately 2,300 acres. It includes all of Centerport Harbor, Duck Island Harbor and Northport Bay.

Laboratory tests have determined that a number of the illnesses were caused by the marine bacteria, *Vibrio parahaemolyticus*, a naturally-occurring marine bacterium generally associated with warm water conditions. *Vibrio parahaemolyticus* (Vp) is not associated with sewage or stormwater contamination of harvest areas.

When ingested, Vp may cause diarrhea, nausea and vomiting, often accompanied by abdominal cramps, fever and chills. Symptoms usually occur within 24 hours of ingestion and full recovery may take up to a week. More severe illness may occur in people with compromised immune systems or underlying chronic diseases.

This is the first time that DEC has implemented closures in these areas in Huntington due to Vp illnesses. Closures due to Vp illnesses were implemented in Oyster Bay Harbor in 2012 and in Oyster Bay Harbor and Cold Spring Harbor in 2013.

DEC reminds all shellfish harvesters to shade their shellfish catch from the sun. Commercial harvesters should use ice or other means of chilling their catch onboard their harvest boats. Shellfish should be stored in self-draining containers, never in standing or stagnant water.

(MORE)

Additionally, information about temporary shellfish closures is available through a recorded message at (631) 444-0480. That message is updated when changes are made to temporary closures. Temporary closure information (<http://www.dec.ny.gov/outdoor/7765.html>), including maps showing the affected areas, is available on DEC's website.

**EMERGENCY DESIGNATION OF SHELLFISH LANDS
IN THE STATE OF NEW YORK
AS UNCERTIFIED FOR THE HARVEST OF SHELLFISH**

Pursuant to the provisions of Subdivisions 13-0307 (1) and (2) and Subdivision 13-0309 (1) of the Environmental Conservation Law and Sections 42.17 and 47.4 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York, and due to documented illnesses caused by *Vibrio parahaemolyticus*, a naturally-occurring marine bacterium, in individuals who consumed shellfish harvested from New York Shellfish Harvest Area NS-3, I, James J. Gilmore, Chief of the Bureau of Marine Resources, Division of Fish, Wildlife & Marine Resources of the Department of Environmental Conservation, hereby designate the shellfish lands described below as **UNCERTIFIED**, effective at sunrise on Friday, September 5, 2014, and continuing until further notice.

Accordingly it is unlawful to harvest oysters from the following areas:

Town of Huntington: All the normally certified areas in Northport Bay, Centerport Harbor, Duck Island Harbor, Lloyd Harbor and that portion of Huntington Bay lying southerly of a line extending easterly from East Fort Point (Lloyd Neck) to Target Rock and thence continuing to the northwesternmost corner of the beach pavilion at the Town of Huntington's Hobart Beach (Eaton's Neck).

Furthermore, it is also unlawful to harvest hard clams from the following areas:

Town of Huntington: All the normally certified shellfish lands in Centerport Harbor, Duck Island Harbor, Price Bend and Northport Bay lying easterly of a line extending southerly from the southernmost point of land at West Beach (also known as Sand City Beach) to the northeastern corner of the beach pavilion at the Town of Huntington's Crescent Beach (Huntington Bay).

I hereby certify that this is the original thereof.

Dated: September 4, 2014

James J. Gilmore, Chief
Bureau of Marine Resources

**Temporary Emergency Shellfish Closure
in the Town of Huntington
Effective sunrise, September 5, 2014**
