Public Health Significance	<p>All of these deficiencies are covered through the HACCP and sanitation requirements already in place as well as in other sections of the 2003 NSSP Guide.</p> <p>In addition, elimination of these deficiencies will help the State Health Authorities to better focus on the Critical Control Points and Sanitation requirements of the NSSP Model Ordinance.</p> <p>Eliminating the above mentioned deficiencies contained in the sections entitled “Other Model Ordinance Requirements” located in sections entitled “Requirements for Dealers” of the 2003 NSSP Guide will not lessen public health protection.</p>														
Cost Information (if available)	Significant cost savings could be realized by states not spending the time and effort to: (1) cite deficiencies; (2) to establish corrective action schedules; and (3) to follow up on deficiencies already covered through HACCP and sanitation requirements already in place and other sections of the 2003 NSSP Guide. Similar cost savings could be also realized by industry.
