

## **Notification of Expansion of Korean Oyster Recall**

December 22, 2015

The following information was provided to the ISSC today by the Korean Shellfish Sanitation Program at the Ministry of Oceans and Fisheries:

You were already informed of the recent recall of Korean oysters associated with 11 illnesses in Hawaii. The Korean Shellfish Sanitation Program has decided to expand the timeframe of recall to include oysters harvested from February 13 to 15 to prevent further outbreak. The whole range of recall would be oysters harvested from February 10 to 15.

Thank you.
